

Profile 6: Small Technology Startup

Sector: Technology

Size: Small Business

Functions: Protect, Recover

Security Profile

- **Protect (Medium Maturity):** The startup uses standard security practices such as regular software updates and strong password policies. However, they lack advanced measures like data encryption and multi-factor authentication.
- **Recover (High Maturity):** The startup has a well-documented recovery plan and performs regular backups. They conduct bi-annual recovery drills to ensure business continuity in case of an incident.
