

Profile 3: Small Financial Services Firm

Sector: Finance

Size: Small Business

Functions: Protect, Detect

Security Profile

- **Protect (High Maturity):** The firm has robust security measures, including encryption for data at rest and in transit, regular patch management, and multi-factor authentication for all critical systems. Employee training on cybersecurity is conducted quarterly.
- **Detect (Medium Maturity):** Basic threat detection measures are in place, including network monitoring and basic SIEM (Security Information and Event Management) capabilities. However, the correlation of logs and alerts is not fully automated, leading to potential gaps in threat detection.
