

Profile 8: Small Manufacturing Business

Sector: Manufacturing

Size: Small Business

Functions: Identify, Detect

Security Profile

- **Identify (Medium Maturity):** The business has a partial inventory of its assets and conducts occasional risk assessments. They understand the importance of identifying critical assets but lack a comprehensive approach.
- **Detect (Medium Maturity):** The business uses basic monitoring tools and conducts regular log reviews. However, there is no centralized system for managing and analyzing security events, leading to potential gaps in threat detection.
