

## Profile 5: Small Community Health Center

**Sector:** Healthcare

**Size:** Small NPO

**Functions:** Detect, Respond

### *Security Profile*

- **Detect (Low Maturity):** The health center has basic logging enabled but lacks real-time monitoring capabilities. They rely on ad-hoc manual checks to identify potential issues. There is no formal process for correlating events or analyzing trends.
- **Respond (Medium Maturity):** The health center has an incident response plan but only conducts annual reviews. They have defined roles and responsibilities, but the response team's training is sporadic. Communication during incidents is effective, but documentation is lacking.
