

## Assessment task 4 – Construction systems (structural components)

### Purpose of assessment

Coordinate and manage the construction of projects (structural components)

This Assessment accounts for 20% of total assessment.

### Assessment task

Provide details on the construction systems adopted for a low-rise residential construction project and how the construction will be coordinated and managed within the project as a whole:

- site evaluation
- excavation
- footings
- floor
- walls
- roof
- waterproofing – general & specific
