Virtual Applications

Installation Guide / User Guide for MAC v5.0

Introduction

Virtual Applications have been created to allow staff and students to access specific software at anytime and from anyplace without having to be on campus.

All you need is internet access and the Omnissa Horizon Client to access the software.

This document will step you through the Omnissa Horizon Client download and installation process as well as explaining how to access files from your local computer when using a virtual application.

The virtual applications are installed on a server at Victoria University and by accessing the Virtual Application Portal you will get access to software required for your course.

This software will run on the server at the University and will stream down to your computer using the Omnissa Horizon Client.

Once you login to the Virtual Application Portal and open a virtual application the software will run and appear on your computer just like any other application.

Please read through the guide below to download and install the software required to connect to your virtual applications and also read the information about how to save files to your local computer.

If you encounter any issues with the software installation or have any questions about using Virtual Applications please contact the

ITS Service Desk

Install

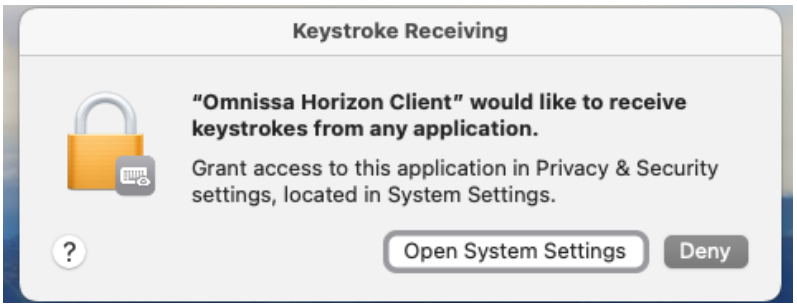

4. Go to Applications folder and double click on Omnissa Horizon Client.

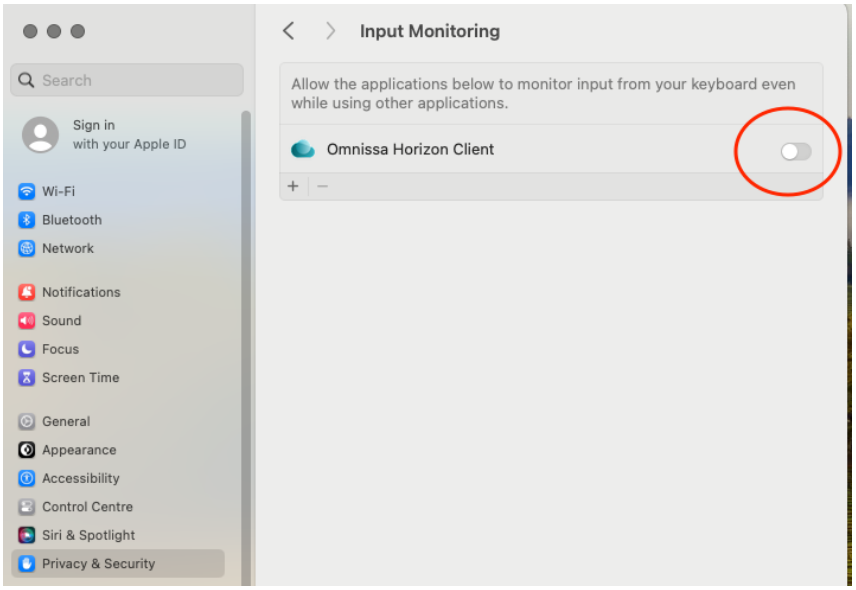

5. Omnissa client needs certain settings such as keyboard and mouse input, permission to local drive etc to be allowed for it to work properly. Please allow or enable settings when prompted.

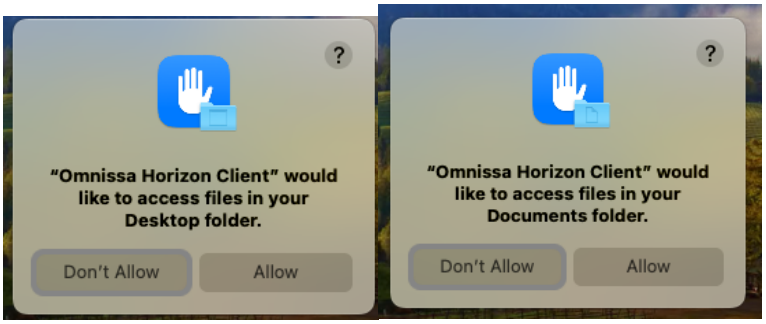

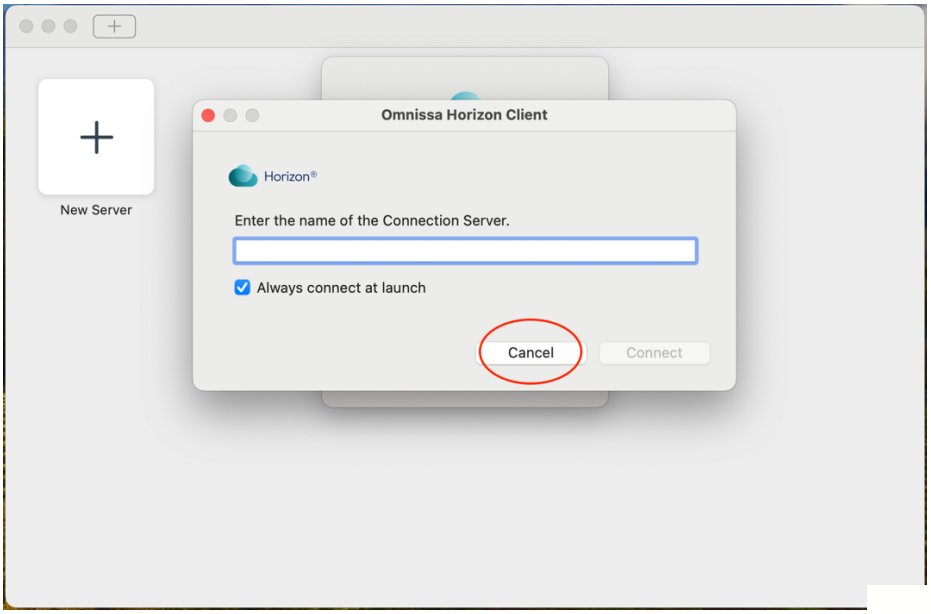

6. Enable the radio button

7. Please click on allow on these options to allow files to be saved onto your desktop and Documents.

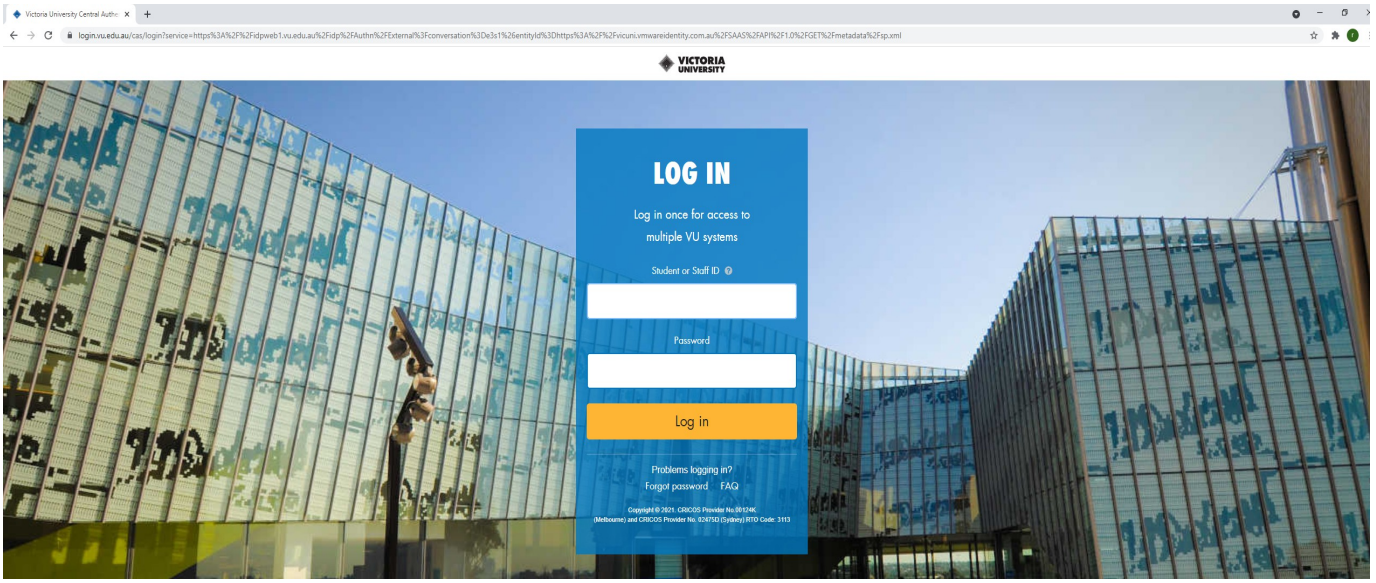

8. Click cancel when prompted to enter server name.

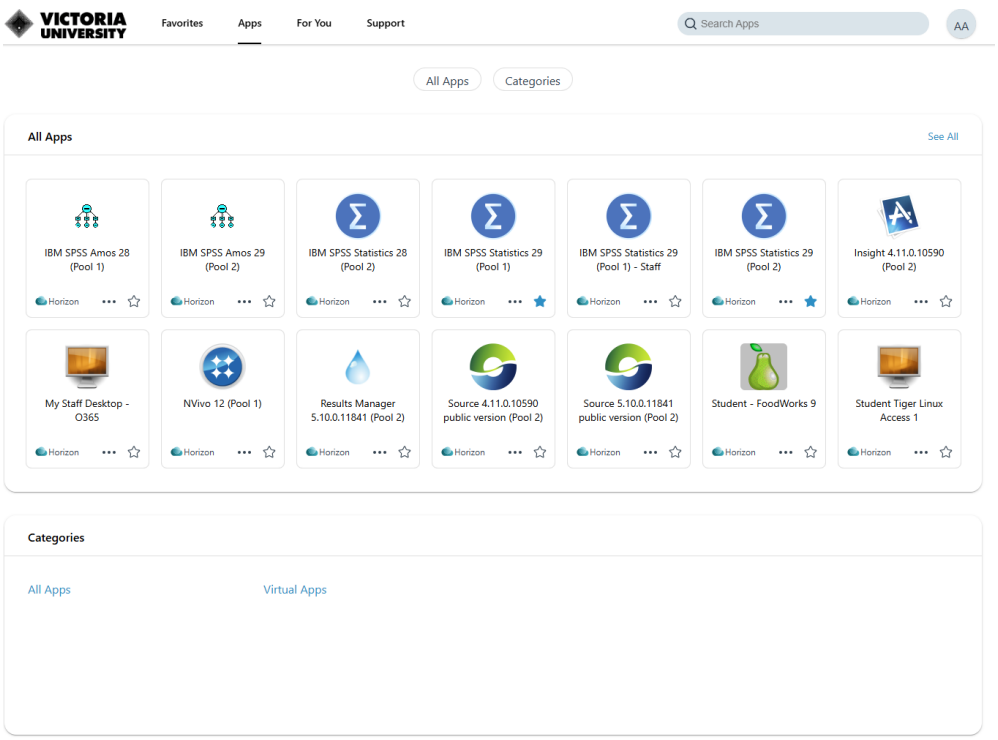

9. To access your Virtual Applications or virtual desktop open the following address in a web browser

myworkspace.vu.edu.au

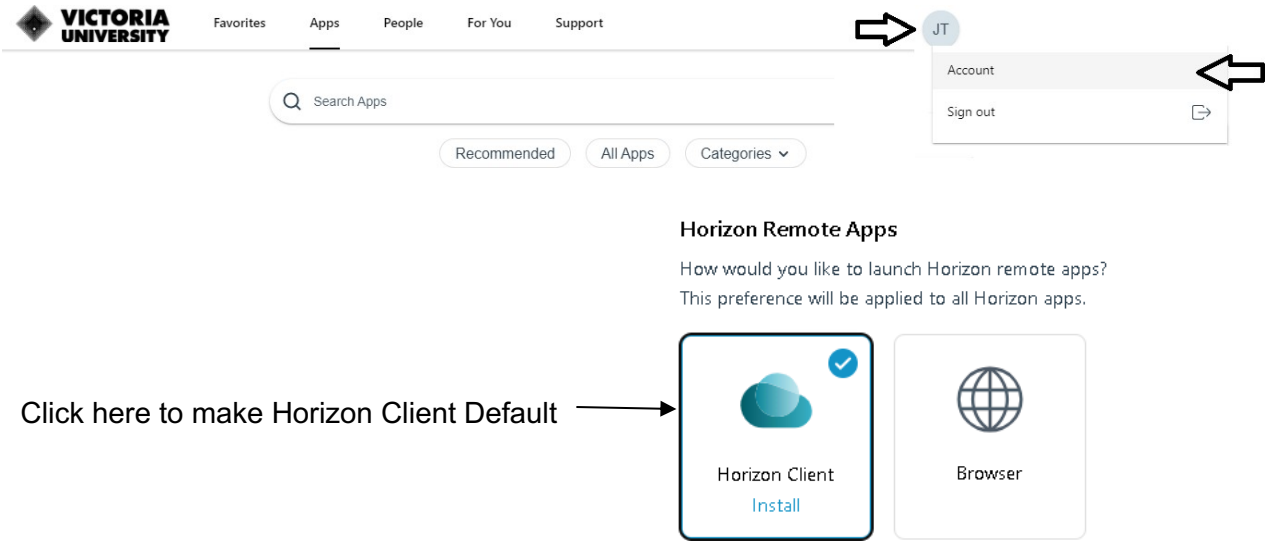

10. Enter your staff/student account details and then click "Login" where you should have the My Workspace page portal open.

11. Make Horizon Client the Default for using Virtual Applications

(You must use the Horizon Client to access files on your local computer)

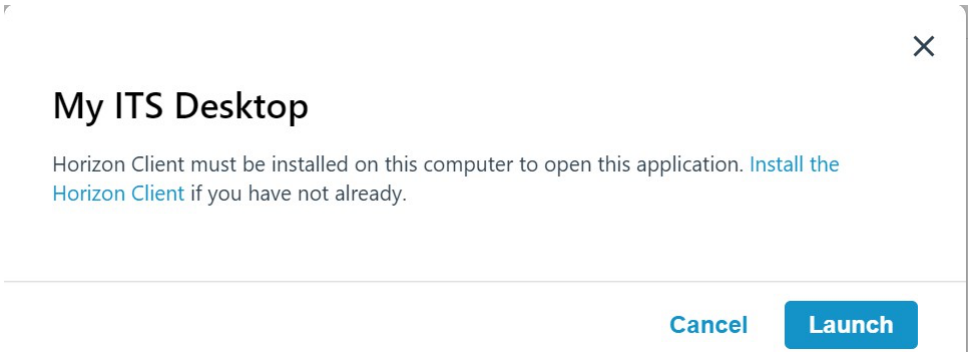

Click here to make Horizon Client Default →

12. Victoria University - Omnissa Horizon Portal

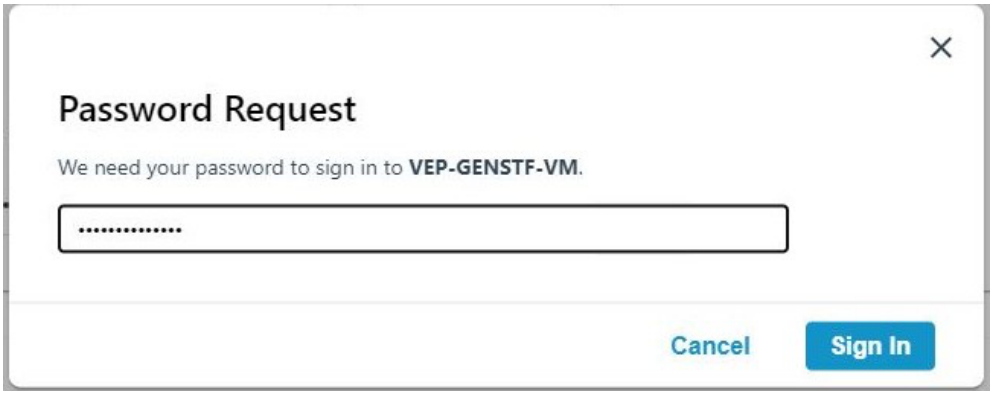

Go to the Apps Page and Click to launch your assigned virtual application or virtual desktop

Virtual Apps	Virtual Desktops
Access 2016 (Pool 1) MS Project 2016 (Pool 1) IBM SPSS Statistics 29 (Pool 1) Visio 2016 (Pool 1) Google Chrome (Pool 1) IBM SPSS Amos 29 (Pool 1)	Student Tiger Linux Access 1 My SAP Desktop 1 Communicare Desktop My Engineering Student Desktop

13. Click Launch

14. Enter your student/staff password

Your now ready to start using your Virtual Applications. Please read the information below to help you understand how to open and save files from your computer.

Opening and Saving Files

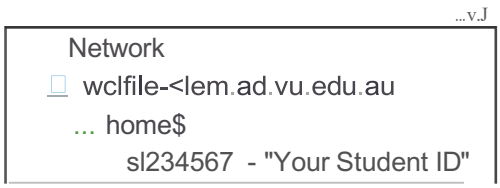

When using the VMWare Horizon Client to access a Virtual Application.

C: Drive - (VMWare Horizon Client)
When using the VMWare Horizon Client and you **browse** to **open or save a** file
the C: Drive shown is actually the Virtual Aplication Server at Victoria University that you are connected to and this is where the Virtual Aplications are stored. **Do not try to save your files here.**
To access your C: Drive on your local computer you will use the Z: Drive. (See below)

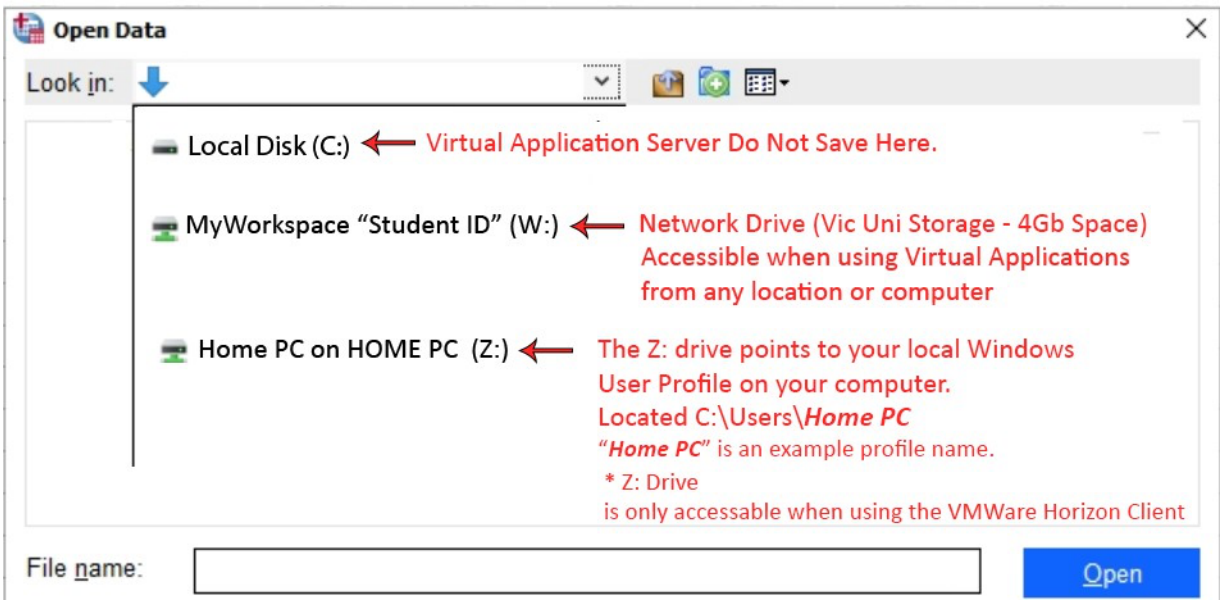

Z: Drive
Your Windows User Profile will be mapped as the Z: Drive when using the VMWare Horizon Client to access your virtual application. You will use the Z: Drive when you want to Open or Save files from or to your Windows User Profile on your computer.

W: Drive
The W: Drive is a Network Drive stored at Victoria University which has 4GB of storage. It can be accessed when using a virtual applications from any location or computer as long as you have Internet access.

The w: Drive may also be displayed as shown below:

Opening and Saving Files

VU Collaborate - Using Chrome Browser Virtual App

W: Drive
To upload or download files to and from the W: Drive (VU Network Drive 4Gb Storage) You will need to use the Google Chrome Virtual Application.
Please note that the normal web browser on your local computer will not have access to the W: Drive (VU Network Drive).

Local Computer Profile - Z: Drive
To upload files from your local computer you will need to choose the Z: Drive in the virtual application which will access the files from your Windows User Profile on your Computer.

Local Computer Files
If your files are located on your computer or usb you can also just use your normal web browser on your computer to upload your files to VU Collaborate.
