Little Hall at Prestwood Infant School

by Olivera Pesic
VU Student 8087432

OVERVIEW

Architechts: De Rosee Sa

Year Built: 2015

Manufacturers: James Hardie

Cost: £158,000

Much-loved children's author Roald Dahl was the inspiration for 'Little hall' facility in Buckinghamshire's Prestwood Infant School.
The £158,000 colourful building is called Little Hall and will also be rented out as a facility for the local community, bringing in much-needed revenue for the school. It has playful features such as a small one-to-one teaching space and two WC's painted to depict a fox's den, a bush with berries and lastly Mr Fox's tail. A large plywood bookcase runs the full length of the front of the building with window seats for reading.

Little Hall has six skylights allowing plenty of natural daylight as well as sustainable internal plywood and concrete flooring. Contractor for the project was RIR Construction Limited.
The children love the building and have found every possible space and area to play in. Children will always learn more effectively if they are inspired and happy, the Little Hall truly does this for the children at Prestwood Infant School.

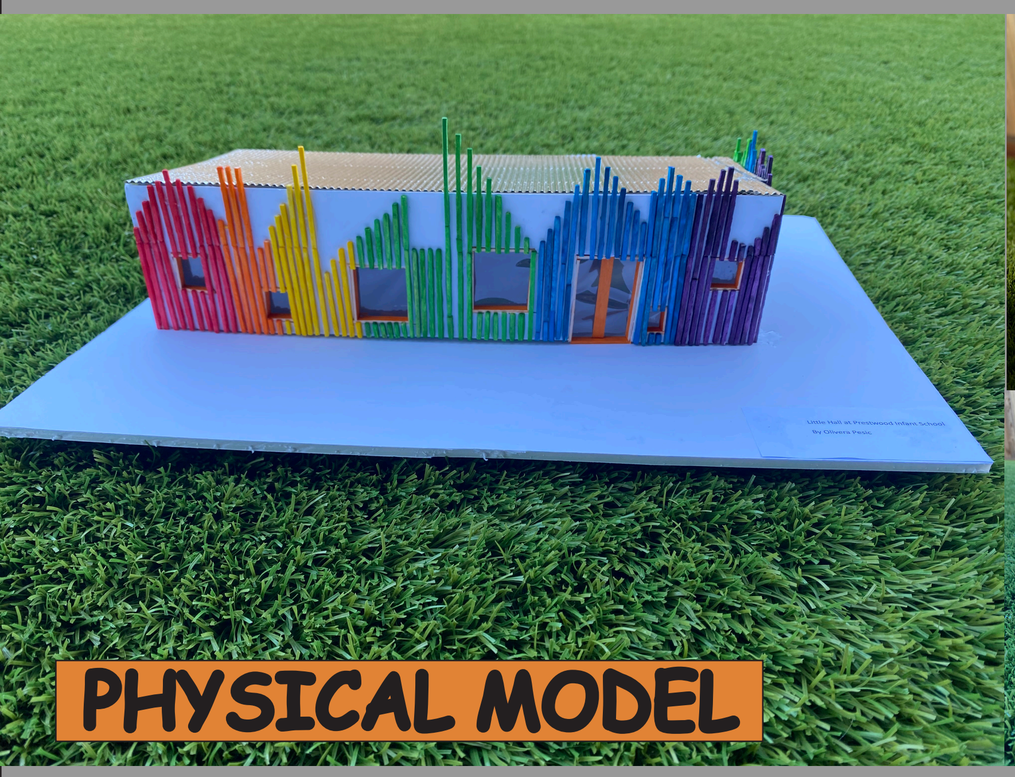
PHYSICAL MODEL

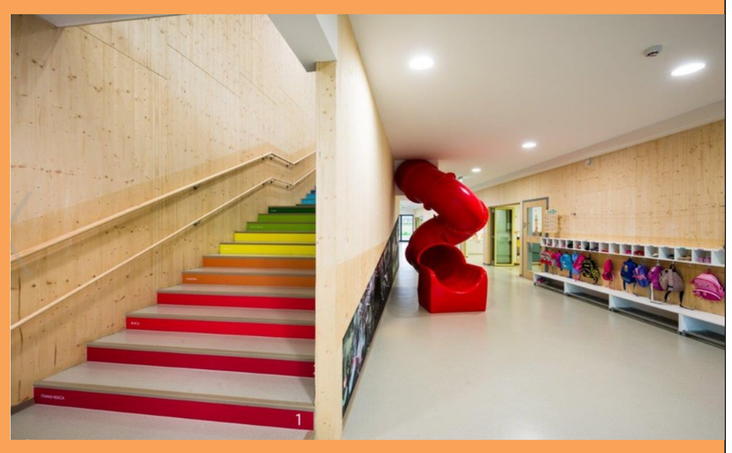


Kindergartens all over the world

Šmartno Timeshare Kindergarten

The kindergarten is located in Šmartno pri Slovenj, Slovenia.
Built: 2015
Area: 1040 m²
Architects: Arhitektura Jure Kotnik

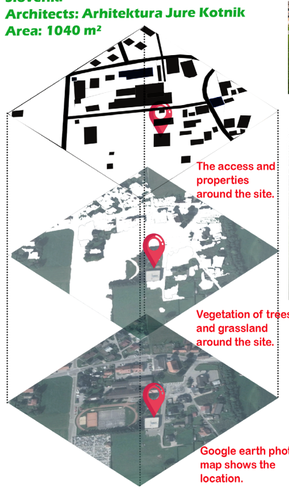
The special design for the building is not only low-energy house, but also the designed focusing on education to encourage interaction, peer learning and self-learning. Children are able to access opening playrooms and unlimited play area. Interior design follows the philosophy of everyone everywhere, children about to select what they want to learn by their interests. Also, the playground is designed to use as many natural materials as possible.



Site Analysis

Map, Sun and Wind Analysis

Type: Educational, Kindergarten
Location: Šmartno pri Slovenj Gradcu, Slovenia
Architects: Arhitektura Jure Kotnik
Area: 1040 m²



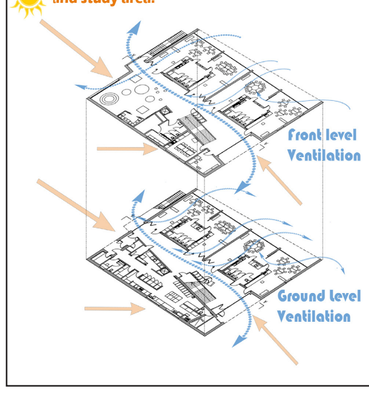
The building is designed and built as a low-energy house by the Sun movement. To meet energy efficiency. The building is designed and built with full- wall timber construction form local wood.

The playground is designed to use as many natural materials as possible. and the landscape is meant to cover all areas of physical activity and play. There are rubber surfaces. grass surfaces. play areas in circles. including sandboxes. a water game area. a climbing area. an area for drawing. etc.

Ventilation and kids movement Analysis

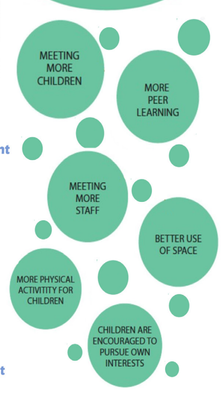
The blue arrows below are showing the building amazing ventilations system with windows and doors on South facade is fully open.

Sun comes in to the room from East, North and West, without direct sunshine into the kids play and study area.



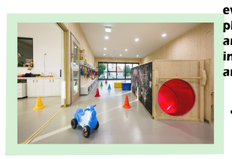
Tranditional Space Use
Playroom door closed

Time Shared Use of Space
Playroom door open

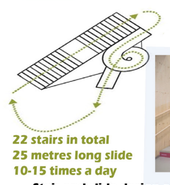


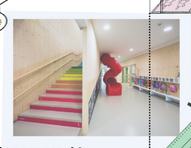
The timeshare approach gives children the chance to enjoy an adjusted schedule according to their interests, and provides comparatively more access to play and learning activities in comparison to traditional kindergartens.

Elevation, Rooms for activies and classes Analysis



The interior design follows this philosophy of everyone everywhere: instead of eight similar playrooms, each room has different play equipment and learning environments. Some playrooms are more into science, others are better furnished for music and art, or sports, or just play.

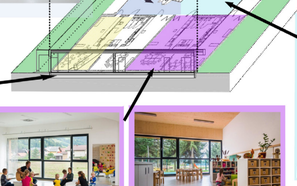


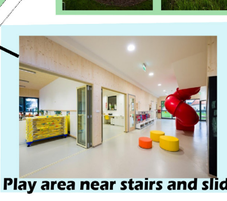


22 stairs in total
25 metres long slide
10-15 times a day

Stair and slide design are provide extra confidence for kids to move vertically within the building.

The playground designed to use as much natural materials as possible.





Play area near stairs and slide

After noon activivities is also available for yoga, dance and music lessons.

Eco Moyo Kindergarten (Kenya)

Kindergartens all over the world

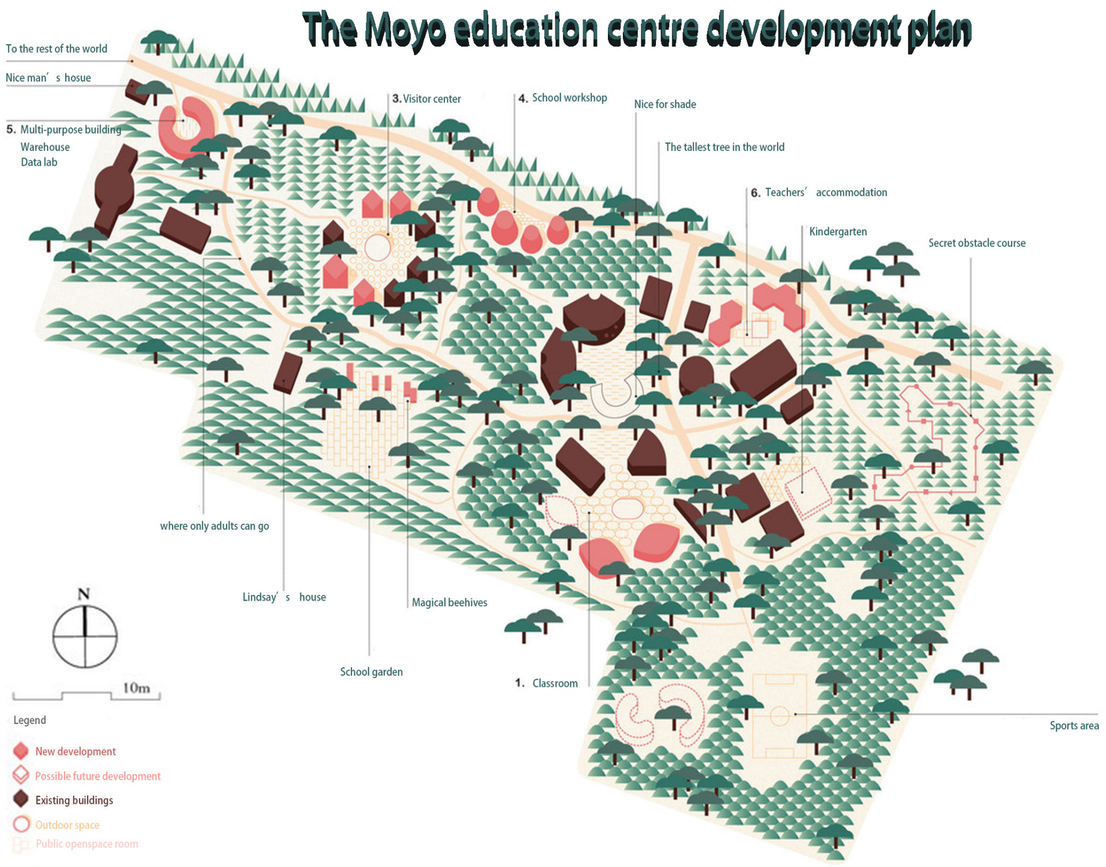
Eco Moyo Education Centre is a Norwegian/Kenyan charity working to increase the quality of life for underprivileged children. As of this date the organization provides free education for more than 200 children in Dzunguni village which is in a rural area in the coastal region of Kilifi county in Kenya

Local resources were key in informing the design, ensuring the building contributed to the localized society and economy, through collaboration with local tradespeople

In utilizing raw materials and hand assembly the building reduced embodied emissions in the construction process.

As of 2022, 240 students from Dzunguni village receive free education in Eco Moyo.

A SITE ANALYSIS



Weather

Climate and Average Weather Year Round in Kilifi Kenya

In Kilifi, the summers are short, hot, and overcast; the winters are warm, dry, windy, and partly cloudy; and it is oppressive year round. Over the course of the year, the temperature typically varies from 22°C to 32°C and is rarely below 21°C or above 33°C.

Based on the beach/pool score, the best time of year to visit Kilifi for hot-weather activities is from late June to mid October.

Kindergartens Around the World

Navyug International Pre-School

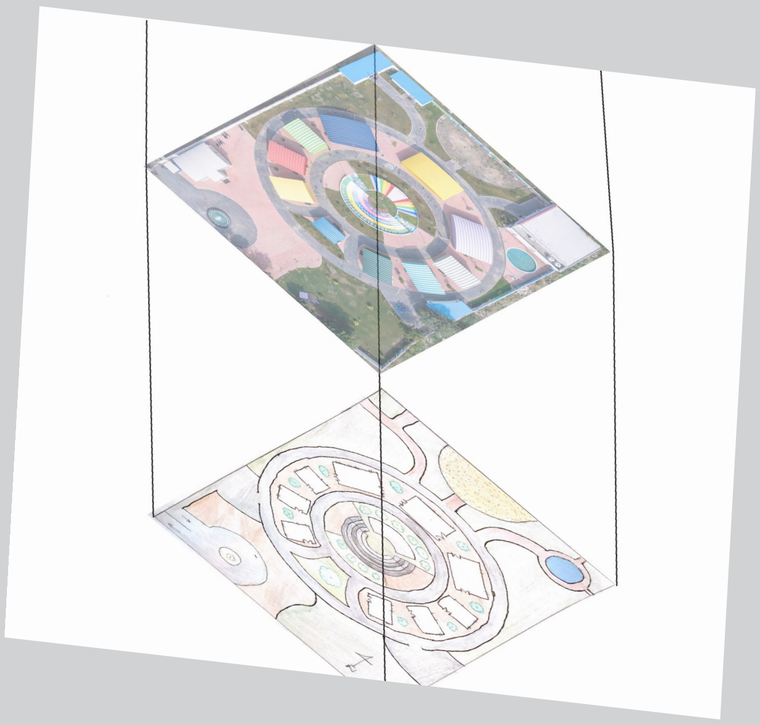
The Gujarat preschool, designed by the creative minds at Shreesh Design Studio, is a perfect example of integrating traditional and modern educational practices in a visually stunning structure.

The design seamlessly blends the ancient Gurukul system with contemporary approaches to create a vibrant learning environment that fosters creativity, critical thinking, and discovery.

The use of colour in the structure's design is striking and functional. Each classroom is designed with a unique colour scheme, adding to the structure's visual appeal while providing a sense of Individuality and identity for each learning space. The bright colours represent the diverse backgrounds of the students and staff who use the space, creating a welcoming and engaging environment that promotes learning and exploration.

The mobility of the structure is another impressive feature of this preschool's design. The architects successfully created a contemporary Gurukul that can be easily moved and adapted to changing needs, ensuring the space remains relevant and useful for years.

The design of this preschool is not only aesthetically pleasing but also highly functional and accessible for the pupils. The design of the classrooms promotes a sense of community and makes it easier for students to navigate the site.



- **Designed by:** Shreesh Design Studio
- **Project Type:** Institution
- **Project Name:** Pre-School
- **Location:** Canal Road, Morbi, Gujarat
- **Year Built:** 2022
- **Duration:** 4 Months
- **Plot Area:** 66,061 Sq.ft
- **Built-up Area:** 11,333 Sq.ft
- **Project Size:** 66,061 Sq.ft
- **Project Cost:** 3 CR
- **Designers:** Dishit & Haresh Parsana
