One-Point Perspective projection

Two-Point Perspective projection

Three-Point Perspective projection

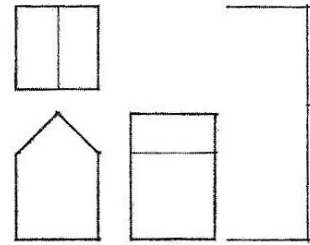

Reference: Architectural graphics.

Projection System

Pictorial System

Orthographic Projection

Plan, section, elevation
Principal face of rectangular form in each view is parallel to the picture plane.

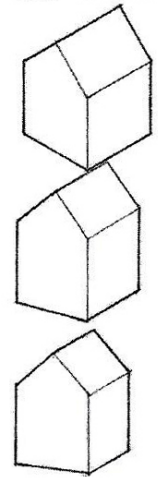

Multiview Drawings

Axonometric Projection

Isometric
Three major axes make equal angles with the picture plane.

Dimetric
Two of the three major axes make equal angles with the picture plane.

Trimetric
Three major axes make different angles with the picture plane.

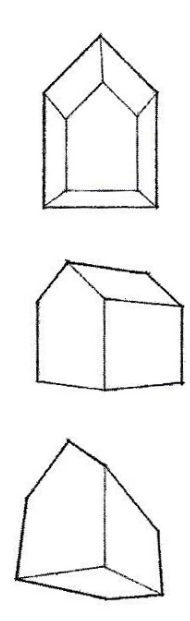

Paraline Drawings

Perspective Projection

1-point Perspective
One horizontal axis is perpendicular to the picture plane; the other horizontal axis and the vertical axis are parallel with the picture plane.

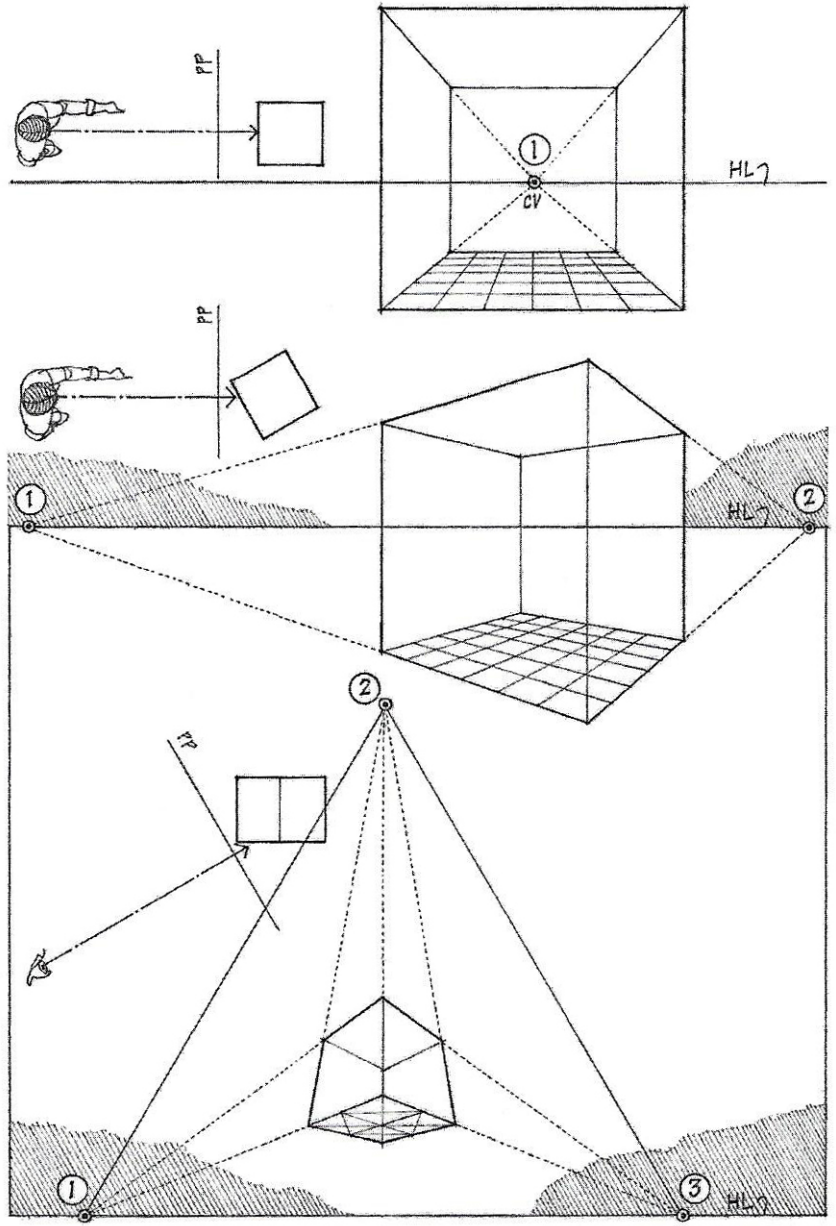

2-point Perspective
Both horizontal axes are oblique to the picture plane; vertical axis remains parallel with the picture plane.

3-point Perspective
Three major axes of rectangular form are oblique to the picture plane.
